

MUSTAPHA HAADI

Kumasi, Ghana | mustaphahaadi04@gmail.com | +233 548 367 637 | linkedin.com/in/mustaphahaadi | github.com/mustaphahaadi

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and First-Class Computer Technology graduate with 26+ months of production DevOps experience and 300+ students trained. Owns infrastructure end-to-end, from provisioning and hardening to incident resolution and operational documentation. Proficient in Linux administration, container orchestration, serverless architecture, and Infrastructure as Code. Currently deepening AI and cloud expertise through Azubi Africa's intensive programme while delivering professional Linux and AI training at ReStartDigital. Targets Cloud Engineer, DevOps Engineer, and AWS Technical Trainer roles.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, Lambda, IAM, VPC, RDS, CloudFormation, ALB, ASG, Route 53)
- **DevOps and CI/CD:** GitHub Actions, Jenkins, Docker Hub, automated pipelines, Git, GitHub
- **Containers:** Docker, Docker Swarm, Kubernetes, multi-stage builds, Compose
- **IaC:** CloudFormation, Terraform
- **Linux:** Ubuntu, Bash, Nginx, systemd, SSH, network namespaces, hardening
- **Networking:** TCP/IP, DNS, SSL/TLS, reverse proxy, load balancing
- **Monitoring:** CloudWatch, uptime monitoring, incident response, runbooks
- **Security:** VPC security, GuardDuty, Inspector, Cisco CyberOps, SIEM
- **Programming:** Python (FastAPI, Django), Bash, JavaScript, SQL
- **Databases:** PostgreSQL, MySQL, RDS, DynamoDB

PROFESSIONAL EXPERIENCE

AWS Cloud and AI Intern (*Azubi Africa | Kumasi, Ghana | Hybrid | May 2026 – Present*)

- Provisioned EC2, S3, Lambda, and CloudFormation across 4+ collaborative team projects in agile sprints.
- Architected Team Alpha's end-to-end cloud infrastructure using Infrastructure as Code methodologies.
- Constructed serverless workflows alongside a 10+ engineer cohort within strictly timed sprint cycles.
- Optimized resource provisioning strategies that eliminated unnecessary cloud spend across environments.
- Documented deployment playbooks enabling seamless knowledge transfer between rotating intern teams.

Technical Trainer (*ReStartDigital | Kumasi, Ghana | On-site | Dec 2025 – Present*)

- Designed two parallel professional tracks: Linux for Cybersecurity and AI for Web Development.
- Delivered hands-on curricula to 40+ working professionals with 90%+ satisfaction scores.
- Built lab guides, exercises, and reference materials from scratch for accelerated learner onboarding.
- Mentored career switchers transitioning into cloud, DevOps, and software engineering disciplines.
- Refined instructional methodology through weekly feedback loops and continuous content iteration.

DevOps Engineer (*ReStartDigital | Kumasi, Ghana | On-site | Aug 2024 – Apr 2026*)

- Operated as sole DevOps engineer owning all cloud infrastructure and release automation pipelines.
- Slashed deployment steps from 12 to 2 per release via GitHub Actions, cutting rollout time 80%.
- Administered 4+ Linux servers with Nginx, SSL/TLS, and systemd, sustaining 99%+ uptime.
- Resolved 20+ production incidents with under 2-hour mean resolution through structured runbooks.
- Authored 10+ operational procedures empowering non-technical staff to execute deployments independently.

PROJECTS AND TECHNICAL PORTFOLIO

AlphaAsk: AI-Powered Student Academic Support Platform [github.com/Azubi-Team-Alpha/AlphaAsk]

- Engineered serverless backend on API Gateway, Lambda, and DynamoDB with multi-provider AI fallback.

- Integrated a resilient multi-provider AI fallback chain: Groq → Gemini → Bedrock.
- Shipped 12 functional API routes documented with OpenAPI specifications for frontend integration.
- Maintained 19 automated tests across Pytest and Vitest suites for reliable continuous integration.
- Logged and resolved 12 real engineering challenges throughout the build.

AlphaPass: Serverless Event Ticketing & Governance Platform [github.com/Azubi-Team-Alpha/event-ticketing--alphapass]

- Directed 6-person team building peer-to-peer ticket resale on Lambda, API Gateway, and DynamoDB.
- Delivered guidance to team members on documenting every process.
- Orchestrated Terraform modules for the infrastructure across the entire serverless stack.
- Drove 47-test automated suite validating reliability before every production deployment.
- Enforced staggered peer reviews maintaining code quality standards across distributed contributors.

AlphaPay: End-to-End Cloud Solution Design & Deployment [github.com/Azubi-Team-Alpha/end-to-end-cloud-solution-design--alphapay]

- Led 6 person team designing static web app infrastructure across EC2, ALB, CloudFront, and Route 53.
- Architected infrastructure spanning EC2, Application Load Balancer, CloudFront, and Route 53.
- Steered CI/CD pipeline setup automating build, test, and deployment workflows to production.
- Coordinated daily sprint planning with clear per-engineer ownership and measurable deliverables.
- Launched live production site serving as portfolio centerpiece for the Azubi Africa graduation showcase.

FastAPI CI/CD Pipeline on AWS EC2 [github.com/mustaphahaadi/fastapi-cicd]

- Containerised FastAPI application with GitHub Actions automating test, build, push, and SSH deployment.
- Configured Nginx reverse proxy with SSL/TLS termination and systemd for persistent process management.
- Eliminated manual releases entirely through webhook-triggered continuous delivery on every merge.
- Realized near-perfect process continuity through health checks and automated rollback hooks.

CERTIFICATIONS

- AWS Cloud Practitioner (CLF-C02) — Amazon Web Services
- Cisco CyberOps Associate — Cisco Networking Academy
- Docker MasterClass: Compose, Swarm, DevOps — Udemy
- Kubernetes For Absolute Beginners — Udemy
- Nginx — Udemy
- Virtualisation and Containers — KodeKloud

EDUCATION

AWS Cloud Intensive Programme (Azubi Africa) — May 2026 – Present

AWS re/Start Programme (AmaliTech) — Aug – Nov 2025

BTech Computer Technology — First Class Honours (Kumasi Technical University) — Jan 2022 – Oct 2025
