Absolute Beginners

Virtualization and Containers

Data Analytics With Power BI

Mustapha Haadi

Cloud & DevOps | AWS Certified | Technical Instructor
Kumasi, Ashanti Region, Ghana

Summary

I'm a Cloud and DevOps Engineer with a deep passion for building infrastructure that is scalable, reliable, and automated. My interests span Cloud Computing, DevOps principles, Infrastructure as Code, CI/CD automation, and container technologies with a particular love for elegant deployment workflows. Beyond engineering, I'm equally passionate about AWS Cloud tutoring and helping others break into the cloud. I hold a First Class Honours degree in Computer Science and an AWS Cloud Practitioner certification. That said, I consider my greatest credential to be my terminal. Over the better part of a year working hands-on with Linux, Docker, Kubernetes, Git, networking, Nginx, automation, and cloud infrastructure, I've built a strong foundation in these technologies in production. My experience spans DevOps, technical support, quality assurance, and research. Working across diverse technology teams, I've contributed to both operational work and the full lifecycle of building and shipping software. Whether as a DevOps Engineer, Technical Support Lead, QA Officer, or Research Assistant, I've always been driven by a genuine curiosity for how things work. Teaching is just as central to who I am as engineering. I've personally taught over 300 people about AWS cloud computing and programming, and in doing so I've developed a real appreciation for breaking down complex concepts for learners of all backgrounds. Helping someone go from confused to confident with cloud technology is one of the most rewarding things I do. Outside of work, you'll find me studying, exploring new technologies, or supporting others with their careers. My certified skills include AWS, Kubernetes, Nginx, virtualisation, and container technology. Open to Cloud/DevOps roles and AWS Trainer opportunities. Let's connect.

Experience

Azubi Africa

AWS Cloud & AI Intern

May 2026 - Present (4 months)

- Gaining hands-on experience in AWS cloud services, AI workflows, and real-world cloud implementation through practical labs and project-based learning.

ReStartDigital

2 years 1 month

Technical Trainer

December 2025 - Present (9 months)

- Delivering cloud and programming training to learners while simplifying technical concepts and supporting career growth into tech roles.

Junior DevOps Engineer

August 2024 - April 2026 (1 year 9 months)

Kumasi

- Supported cloud infrastructure, deployment workflows, automation tasks, and system reliability using DevOps tools and practices.

Institute of Research, Innovation & Development

Technical Support Lead

November 2025 - Present (10 months)

Kumasi Metropolitan District

- Led technical support activities by troubleshooting systems, resolving user issues, and ensuring smooth day-to-day technology operations.

Esoko

Quality Assurance Officer

March 2025 - May 2026 (1 year 3 months)

Ghana Skills Development Fund

Technical Support Lead - SHS Waste Management Quiz 2025

June 2025 - August 2025 (3 months)

Kumasi

- Managed technical setup and support for the quiz event to ensure seamless participation and minimal system disruptions at the Kumasi Technical University hall and Prempeh Assembly hall venues.

Ghana-India Kofi Annan Centre of Excellence in ICT (GI-KACE)

Assistant Instructor

October 2024 - December 2024 (3 months)

- Supported technical training sessions by guiding learners through practical exercises and helping them understand key technology concepts.

Kumasi Technical University
Technical & Research Support Associate
May 2024 - December 2024 (8 months)
Kumasi

- Provided technical and research support across academic projects, system tasks, and operational activities within the university environment.

Kumasi Technical University
Research Assistant
August 2023 - December 2023 (5 months)
Kumasi

- Assisted with research execution through data collection, technical support, documentation, and analytical contributions to academic projects.

Education

Azubi Africa
AWS Cloud Intensive Program · (May 2026)

AmaliTech
AWS re/Start Programme

Kumasi Technical University
Bachelor's degree, Computer Technology
